Presentation

The Postgraduate Diploma (Advanced Specialisation) in BANKING MANAGEMENT, INSURANCE AND FINANCIAL MARKETS, as an innovative course on the international scene, in view of the globalisation of international trade, communication, the financial, insurance and transport markets, responds to the demands raised by the evolution of economic integration processes and international cooperation, as well as the surrounding constraints, both political and legal, and economic, financial, social and cultural, in the context of the growing complexity of International Relations. The desire and need of many graduates and technicians to deepen their scientific and technical knowledge in the fields of banking, insurance, the stock exchange and other financial markets has thus been met, given the appropriate investment strategies, internationalisation and international cooperation in the context of the globalised world power system. Accordingly, the Postgraduate Diploma (Advanced Specialisation) in BANKING MANAGEMENT, INSURANCE and FINANCIAL MARKETS represents a highly interdisciplinary and practical component and contains the most important scientific areas of study in these fields of knowledge. Students of this PG will have privileged access to the activities of CEERI-Centre for European Studies and International Relations and OLAE Observatório Lusófono de Atividades Económicas

resources and technologies we provide for distance learning and collaboration.
