Presentation

To provide students with a set of contents that will enable them to acquire the knowledge and develop the skills, practices and behaviour needed to carry out activities associated with implementing environmental management systems and audits, integrating the principles of sustainability. The aim is to learn about the various sustainability tools and regulations for implementing environmental management systems, life cycle analysis and the assessment of significant environmental aspects and impacts in the management of organisations.

STUDY PLAN

1st Year / Common Core

Anual	ects
Environmental Management and Sustainability	6
