## Duration

1.5 Years

## Credits

90 ects

## Presentation

The Professional Master's program offers specialized training to address the growing developments in the job market. It aims to provide motivated and highly capable students with hands-on, innovative practical training within the national and European context. The education is of high quality, grounded in evidence, and focused on acquiring skills for resolving complex situations in real work settings. The offering of this Master's program in both workday and after-work hours, with a hybrid structure of online and in-person classes, allows students to better balance their academic and active lives. This flexibility enables them to study, acquire, and deepen knowledge while simultaneously practicing their profession on a day-to-day basis.
