Duration

1 Year

Credits

50 ects

Presentation

The course developed in cooperation with TAP is a high-level training proposal, professionally certified by the National Civil Aviation Authority (ANAC) Part 66 B1.1 in accordance with Commission Regulation (EU) No. 11321/2014 of 26 November 2014. Focussing on the technical and scientific quality of the skills to be developed, in order to ensure the success of the quality of the learning acquired, the course is aimed at graduates and company executives looking for complementary knowledge and certification, as well as those wishing to acquire training in the field of aircraft maintenance.
