## **Duration**

2 Years

## **Credits**

120 ects

## **Presentation**

The CS in Clinical Neuropsychology continues the training of the 1st cycle in Psychology, complementing the Organic Unit's (OU) 2nd cycle training offer. With a theoretical-practical nature, the CS aims to promote the acquisition, training and improvement of clinical skills in the area of neuropsychological assessment and rehabilitation in different neuropathological conditions and throughout the life cycle, while also training students for areas of research at the interface of Psychology and Neurosciences. This includes fundamental skills for professional practice, such as critical thinking, solid ethical principles and collaboration with peers in an intervention context that is essentially multidisciplinary.

# STUDY PLAN

## 1st Year / Common Core

1º Semestre	ects	2º Semestre	ects
Cognitive and Affective Neuroscience	4	Clinical Neuropsychology Skills Laboratory	4
Fundamentals of Brain Function	4	Data Analysis Methods in Neuropsychology	4
