## Presentation

Offering innovative/specialised training to meet the growing developments and needs of the Veterinary Nursing job market. Daytime/after-work, hybrid, online and face-to-face classes allow students to better reconcile their professional and working lives, giving them the flexibility to study, acquire and deepen their knowledge while practising their profession on a daily basis. The course, with its hands-on training, is organised into 1.5 years. The 1st year includes theoretical, theoretical-practical and practical components, with the aim of deepening knowledge in Clinical Veterinary Nursing. The 3rd semester is dedicated to carrying out an internship, according to the student's areas of preference, and to writing a project or dissertation.
