## Presentation

Introduction to Veterinary Acupuncture - from Ancient to Modern An exclusive mini-course exploring the fascinating world of homeopathy applied to veterinary medicine, based on the principles of Traditional Chinese Medicine (TCM). More than simply associating points with the medicines created by Dr. Weihe, we present an innovative approach that connects homeopathic processes to TCM diagnosis. Inspired by the concepts of Jan Scholten, on homeopathy structured by the periodic table, and Rajan Sankaran, with his theories of the kingdoms and the miasmatic system, Dr. Eduardo Lobo brings a unique vision to support professionals, especially veterinary acupuncturists, in choosing the most appropriate homeopathic medicine.
