Presentation

Offering innovative/specialised training to meet the growing developments and needs of the Veterinary Nursing job market. Daytime/after-work, hybrid, online and face-to-face classes allow students to better reconcile their professional and working lives, giving them the flexibility to study, acquire and deepen their knowledge while practising their profession on a daily basis. The course, with its hands-on practical training, lasts approximately one year. It includes theoretical, theoretical-practical and practical components, with the aim of deepening your knowledge of Clinical Veterinary Nursing.
